DO'S

- Your jewelry should be cleaned regularly.
- You can use a very soft brush and soapy water to clean it, then rinse your piece with clean lukewarm water. We recommend that you store your jewels properly in a hard case (contact with other jewelry pieces could cause scratches).
- Chains should be closed and laid flat to avoid tangling.
- Consider removing your jewelry before going to sleep, practicing any sport, washing your hands or using corrosive products.
- This product is for use of wearing only with basic strength for holding diamonds/gemstone only.
- Diamond carat weight (CTW) represent the approximate total weight of all diamond, in a piece.
- Metal purity is stamped on the jewellery.
- Natural color diamonds and gems stones may have been treated or enhanced by heating, irradiation, oiling, filling, or diffusion. In such case declaration shall be provided.
- Unless otherwise specified all diamonds are sourced from mines, though lab-grown diamonds could in inadvertently be substituted by the manufacturer.

DON'TS

- Avoid contact with Fragrance, alcohol, cosmetics, ammonia, chlorine and keep your pieces away from intense sources of heat and extreme temperature changes.
